INTRODUCTION

USAF Series T-34A trainer aircraft is manufactured for primary pilot training by BEECH AIRCRAFT CORPORATION, Wichita 1, Kansas. The USAF serial numbers shown in the table below, provide positive identification for the respective Series or Models of aircraft covered in this breakdown.

Beech

AF Ser. 52-7626 thru 52-7685
AF Ser. 53-5506 thru 53-3395
AF Ser. 53-4157 thru 53-4206
AF Ser. 55-140 thru 55-289

Canadian Car & Foundry

AF Ser. 52-8253 thru 52-8286
AF Ser. 53-4091 thru 53-4156

This Illustrated Parts Breakdown lists and illustrates a complete and systematic disassembly of replaceable parts on the airplane. A major exploded illustration of the airplane is shown in figure 1, the last figure in the Introduction.

RELATION OF MAINTENANCE AND STRUCTURAL REPAIR HANDBOOKS AND THE ILLUSTRATED PARTS BREAKDOWN.

Maintenance and Structural Repair Handbooks, T.O. 1T-34A-2 and T.O. 1T-34A-3, applicable to T-34A aircraft use part numbers identical to part numbers used in this breakdown. Thus, the exploded views of all assemblies shown in order of disassembly may be used to supplement pictorially the disassembly and reassembly procedures outlined in the other handbooks. Also, a use for this breakdown is for positive identification of correct attaching parts for all assemblies and individual components.

NOMENCLATURE AND ASSEMBLY ORDER.

The Group Assembly Parts List maintains an order of disassembly by a system of indentation of part titles. By this method an assembly, listed in column one, will be broken down with component details listed in column two. If a detail is in turn an assembly its component details will appear in column three. In this manner, it is possible to determine the parts that would be received if an assembly were ordered since all replaceable parts contained within the assembly would be listed in the next column to the right. Attaching parts such as screws, bolts, nuts, etc., are listed in the same column immediately following the details of the part or parts they attach. If two or more assemblies are made up of a large majority of identical parts or the assemblies are left and right hand, the assemblies are listed together with their detail parts listed as common for both assemblies. The UNITS PER ASSEMBLY column indicates the number of detail parts required per assembly only. The total quantity of any units per airplane may be found in Section III, Numerical Parts List.

USABLE ON CODE COLUMN.

A code symbol consisting of the basic model usability code letter A, followed by a dash and a number, is employed to denote parts having specific use within a series or model. In order to properly determine the portions of aircraft involved by specific use parts, the person using this breakdown may take the alternate code symbol shown opposite a part in the USABLE ON CODE column and refer to the table in the Introduction, explaining the effectivity of the symbols used to find the serial range affected by specific use items. Also, a chart has been provided and follows the first paragraph in the Introduction; to show the blocks of USAF serial numbers assigned to the Series T-34A aircraft.

The table shown below will provide the exact usage of all coded parts listed in this breakdown.

Code	Aircraft Serial Effectivity

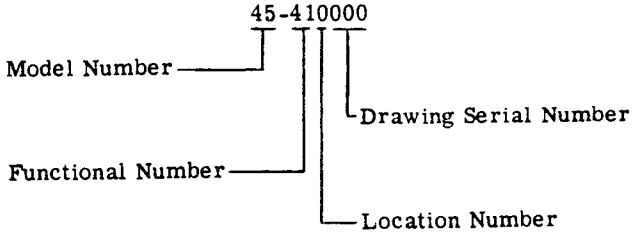
ORDERING PARTS.

When ordering parts, always use the COMPLETE manufacturer's parts number listed in the Part Number column. When ordering vendor's parts, always include the vendor's name which is coded numerically and shown in parenthesis after the part title.

DRAWING NUMBER SYSTEM.

Basic part or drawing numbers consist of a series of eight digits. These digits are broken down as follows:



Model Number 45 is the Beech Aircraft Corporation designation of the airplane. Functional numbers are assigned based upon the function or operation for which parts or assemblies are designed. Functional numbers are as follows:

10 Wing Installation	55 Heating & Ventilating
11 Outer Wing	58 Hydraulics
12 Center	59 Loose Tools & Accessories
13 Aileron	60 Empennage
16 Flap	61 Elevator
17 Wing Tip	62 Horizontal Stabilizer
21 Wing Armament	63 Rudder
22 External Armament	64 Vertical Stabilizer
24 Fuselage Armament	65 Stabilizer V-Tail
25 Gun Camera and Tow Target	66 Elevator V-Tail
26 Pyrotechnics	81 Landing Gear
32 Instruments	82 Tail Wheel & Nose Wheel
34 Radio	87 Ski Gear
36 Electrical	88 Floats
38 Specification Control Drawings	91 Demountable Power Plant
40 Fuselage Complete	92 Fuel System
41 Fuselage Nose Section	93 Oil System
42 Fuselage Cockpit Section	94 Engine Controls
43 Fuselage Middle Section	95 Exhaust System
44 Fuselage Rear Section	96 Propeller
49 Armor	97 Air Systems
52 Surface Controls	98 Nacelle
53 Furnishings	99 Power Transmission Units
54 Pressurization	

Location numbers indicate the position of parts or assemblies within the airplane. Since the functional numbers which are applied to structural parts are self-locating, location numbers are used only with items of equipment or systems such as control or general installations. Location numbers are as follows:

0 General	5 Not Used
1 Wing Section	6 Empennage Section
2 Not Used	7 Not Used
3 Not Used	8 Landing Gear Section
4 Fuselage Section	9 Engine Section

The zero (0) is used in the location number position on equipment or system installation drawings when the parts or assemblies shown are located in more than one of the major sections of the airplane as defined by the other location numbers.

MANUFACTURERS' CODE SYMBOLS.

Manufacturers' code symbols utilized in this publication are in accordance with the Federal Supply Code for Manufacturers (Cataloging Handbook H 4). The following list contains the five-digit code with the manufacturer's name and address to which the code has been assigned.

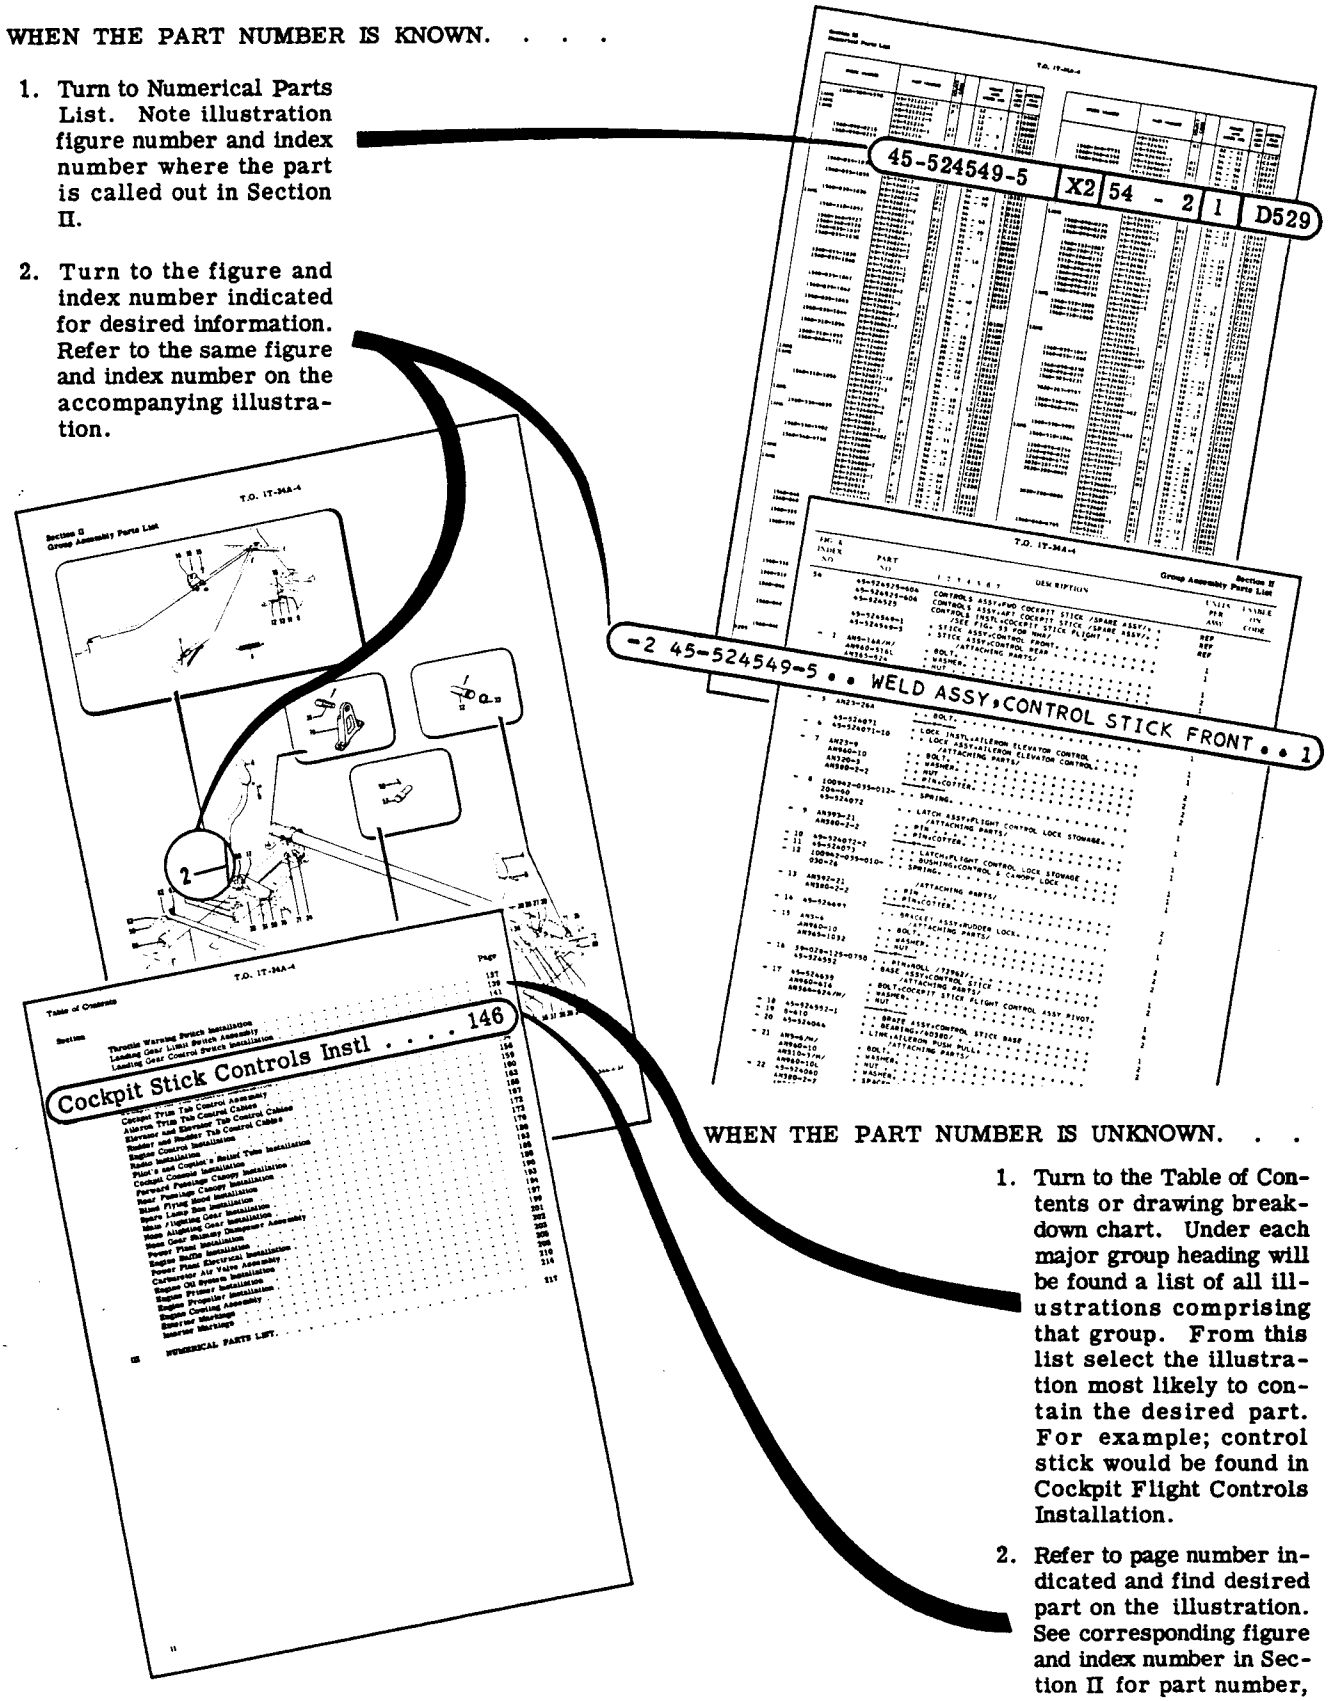
HOW TO USE THIS ILLUSTRATED PARTS BREAKDOWN

WHEN THE PART NUMBER IS KNOWN. . . .

1. Turn to Numerical Parts List. Note illustration figure number and index number where the part is called out in Section II.

2. Turn to the figure and index number indicated for desired information. Refer to the same figure and index number on the accompanying illustration.



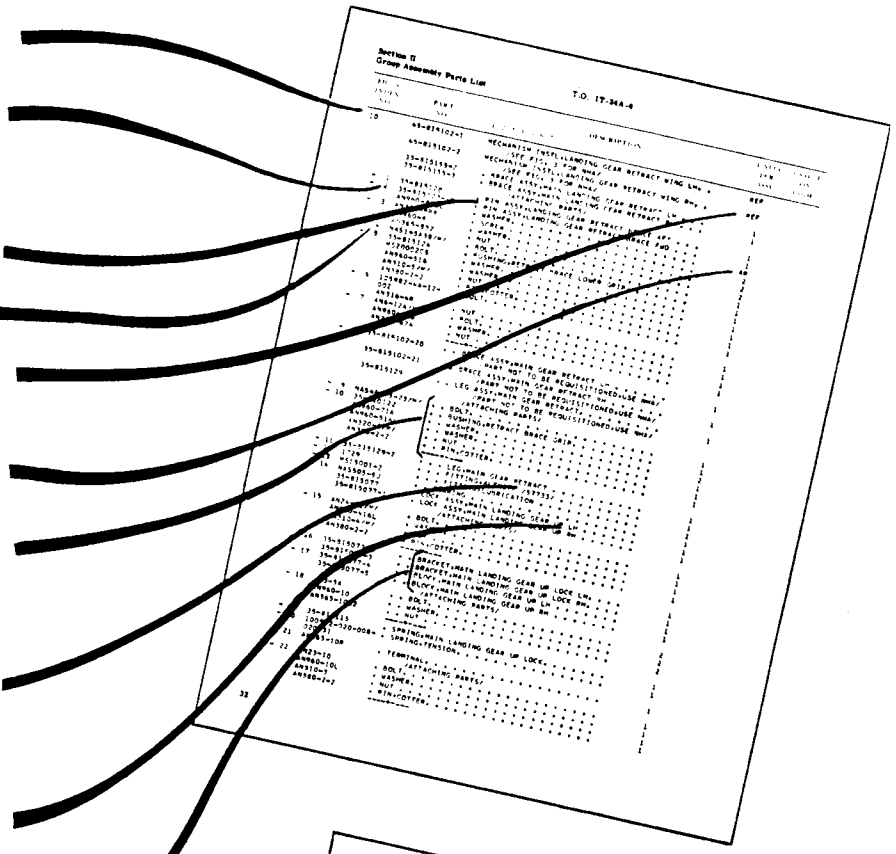
WHEN THE PART NUMBER IS UNKNOWN. . .

1. Turn to the Table of Contents or drawing breakdown chart. Under each major group heading will be found a list of all illustrations comprising that group. From this list select the illustration most likely to contain the desired part. For example; control stick would be found in Cockpit Flight Controls Installation.

2. Refer to page number indicated and find desired part on the illustration. See corresponding figure and index number in Section II for part number, nomenclature, etc.

GROUP ASSEMBLY PARTS LIST:

1. FIGURE NUMBER of corresponding illustration.
2. INDEX NUMBER of part on illustration.
3. Assemblies having no detail parts listed are permanent units for which component parts are not stocked.
4. PART NUMBER.
5. REF in Units per Assy column denotes previous callout of an installation or assy.
6. AR indicates "As Required".
7. ATTACHING PARTS follow the item being attached and precede component parts of the item.
8. Parts furnished by the Government, Vendor parts, or both, are coded. See the numerical list of vendors.
9. LEFT- AND RIGHT-HAND PARTS are listed together under one index number and left-hand parts only are shown on the illustrations.
10. NEXT HIGHER ASSY precedes the detail parts (components) and is listed in the immediate column to the left.



NUMERICAL PARTS LIST:

1. Commercial parts or parts for which no part number is available are listed in the Numerical Parts List in alphabetical order.
2. FIGURE NUMBER of the illustration.
3. INDEX NUMBER of part on the illustration.
4. STANDARD PARTS: Only one figure and index number is listed.
5. TOTAL QUANTITY column summarized the callouts in Section II and is the total quantity of units per airplane.
